

Invitation to our new working group

Predictive maintenance

The first workshop of this working group is planned for
March 6 in Turku, Finland.

Starting time: 11.00 (Finnish time), 10.00 Central European Time (CET), UTC+1

You can join in person or via our Zoom-link, see below.

This workshop will cover both infrastructure and rolling stock topics. During the workshop, it will be important to clarify if there is a need for separation of infrastructure and rolling stock topics.

Agenda:

- Getting to know each other = short presentation on each “site/organization” including:
 - Current situation and future goals regarding predictive maintenance
 - Need for separation of infrastructure and rolling stock topics?
 - Use of big data in the home organization
 - What specific challenges do you face that might be relevant for this topic?
- Specific issues within maintenance and operations having the most AI potential
- Next meeting occasion to be decided: Suggestion: Within 8 weeks.

Your working group leader:

Ville Sjöholm, Rolling Stock Specialist, Turku Tramway; Finland

Phone +358 40 584 0300 E-mail: ville.sjoholm@turunraitiotie.fi
